

An Elementary Guide to the
Vehicle of Prodigy

An Elementary Guide to the Vehicle of Prodigy

Proem

World civilization is dominated by religions and cultures that lead people to think, feel and act according to old-world ideas whose credibility and relevancy have diminished in light of the knowledge humanity now possesses. Today, people abandon these legacy paths at unprecedented rates.

The state of disharmony upon this planet indicates that the manifold traditions have failed—the Earth, our homeworld, is dying. It is being killed by the actions of our own species of life. Legacy religions and cultures have no ability to save this world from man's selfish and ignorant destructiveness before what can be saved disappears forever. A new tradition was desperately needed, and so has emerged, to rightly guide humanity forward. This tradition is the Vehicle of Prodigy.

The sublime order of the Vehicle of Prodigy is at once an order of upright and noble men and women who stand for objective truth, who speak for all life, who through self-discipline and sacrifice work to spread compassion and duty to all peoples of the Earth.

Elements of the Vehicle

The Vehicle contains six essential Elements:

- I. Universal Compassion
- II. Knowledge and Understanding
- III. Balance with Earth
- IV. Specialized Discipline
- V. Paradigm
- VI. Transmission

I. Universal Compassion

In all the universe nothing exists that is more precious, more beautiful, more perfect than universal compassion for all suffering beings. When humans live and act in accordance with unbound compassion they themselves become precious, beautiful, nearer perfection.

Many trillions of conscious beings have experienced incalculable pain and suffering at the hands of our forebearers, but that is not our species' path forward. For modern humans to live moral, ethical lives we must first understand the misery that humans create by enslaving conscious creatures, slaughtering them for food, and using their bodies for products not necessary for our survival. Secondly, we must renounce these practices collectively and for all time. As the highest principle known to exist, compassion is the Vehicle's core virtue.

II. Knowledge and Understanding

Having seized this planet from the direction of nature, humans alone have assumed accountability for its fate. Within solar systems there are no greater responsibilities than those entailed in the assumption of control over a living world.

For a world-dominating species, ignorance coupled with great power is a threat to all terrestrial life. To effectively operate a global civilization

alongside millions of other lifeforms within a deeply complex biological infrastructure, an awareness of the incomprehensible scale and characteristics of reality; an understanding of our ancestors' and other organisms' deep evolutionary history; knowledge of ecological and zoological conditions, trajectories, and possibilities; continual analysis of our ongoing relationship with rapidly advancing technologies; these and much more are critical to meeting our species' positional responsibilities as overseers of the Earth. Such recognition is of paramount importance to understanding the meaning and purpose of human life in this universe.

This Element constitutes the essential aspect of and path toward enlightenment, the key to fundamental transformation of both individual and civilization. With the power of reason and the findings of science we build our understanding of the complex universe through the ceaseless pursuit of knowledge.

III. Balance with Earth

We are a people of high awareness. We do not represent any government, anywhere. We represent living beings wherever life exists. Upon the only living world of the Sol system a single form of life threatens the existence of all others—that lifeform is *Homo sapiens*. Ancient strings of life on this world are disappearing and are being replaced by the vastly overabundant humans and their ever-expanding infrastructure. Ecological and environmental science clearly reveals that which ordinary people and the greater world civilization regard with staggering negligence—that human overpopulation is the central underlying cause of the destruction of our homeworld. As legacy religions often misguide humans to overproduce, modern cultures sit idly in fear of addressing the truth regarding this paramount existential issue.

For this world's species to survive humankind must move to achieve balance with Earth; specific decisions must be made and specific actions must be taken. No responsible individual, people, or nation can ignore the simple objective fact that human family size is a primary causal determinant of Earth's fate. As must be expected, the base

human instinct to reproduce at will drives the natural world toward destruction. Intelligence and wisdom must override this instinct, the instinct which endangers all life on our homeworld, our only refuge in space, sacred to all its living things.

The Earth system is in ecological crisis, yet human population rises unabated. To counteract this destructive phenomenon our order sets forth to all humans for all time the *Primal Declamations of Fundamental Equilibrium*. It is critical that humans on Earth receive guidance to reproduce sustainably to safeguard our home, its life, and all civilization, forever.

The Primal Declamations are not law, they are an official register of the Vehicle's resolutions on Earth's global ecological state. Within the Continuum of the Sealed, however, the sworn embrace its guidance as cultural law. This register is the result of human intelligence prioritizing and addressing a planetary problem that must not be further ignored as it unfolds through the coming epochs. May every person on Earth hear its calls and heed its words.

The Primal Declamations of Fundamental Equilibrium

Declamation One, 1st Epoch:

"In this epoch our numbers have overrun nature and world population is still growing. Unique creatures and exotic plants are being lost forever. The peace and beauty of wild places that sentient beings need is leaving us. Our world is in danger. We must alter course. Our swollen numbers decimate nature, and on the horizon science is working to stop and reverse human aging. We must strive to find balance with nature today, but long before our species reaches this balance deaths may rapidly decline. We must act to save our planet now and we must also plan for what is ahead. Vehicle of Prodigy calls upon all humans of the Earth to join us in the effort to save our refuge in space. Live and love, but in this era make the decision, now celebrated, to have a maximum of two children. To those who truly desire to do what is needed for our world, our future, and all life, having just one child, or even to remain childless, will maximize one's personal contribution to

this most important effort of our species. A shameful number of people care nothing for our home planet. In fact there are millions who believe that our civilization's collapse would actually fulfill their misguided concept of religion. Such humans exemplify how deeply ignorance can entrench itself in the most powerful organism on Earth. Each of you alive today, observe the horizon. Monumental change is upon us. We cannot simply follow courses that were plotted millennia ago. The individuals who laid in those courses could not conceive of the terrain that we now find ourselves in. We must react to our world as we find it today. My people of Earth, do not despair. This vehicle is here to guide you, this Vehicle of Prodigy was engineered to save this world."

IV. Specialized Discipline

Five distinct practices serve to empower and assist adherents of the Vehicle as they labor to change the world and fulfill their own lives. These five practices are:

- Entheogenics
- Meditation
- Neigong
- Martial Arts
- Physical Conditioning

Each discipline has persevered for thousands of years because each has consistently elevated its practitioners to the heights of human experience. Each is rooted in natural law. Select at least one practice for long-term study. Research the theory, commit to practice, strive for mastery.

V. Paradigm

The burden of the knowledge of our homeworld's destruction at indifferent human hands, and the burden of the knowledge of the incalculable anguish that humans place upon trillions of feeling

creatures is too much to bear alone. Indeed, these burdens were not meant to be carried alone but shared with every human on Earth. This is the primary function of the Paradigm—to warn all humans who gaze upon it of the pain and destruction their species is responsible for causing. This symbol also represents our noble, discerning culture and serves as a catalyst for its transmission to the world.

To enter the Vehicle one must make a clear decision to put the suffering of living beings before palate, and to do what is necessary to save this world. A day is then chosen to begin walking the path. For one Earth year no mark is taken. During this year one must not consume animals or intentionally harm innocent creatures. One must follow the Declamation of Equilibrium for our epoch. Any failure to maintain Elements I or III restarts the first year.

On the first day of the second year one takes an oath to live according to the Vehicle for one year. On this day the Mark of Paradigm is placed upon the right hand. This tilak must be continually replaced, a constant reminder of the work required to eradicate human cruelty and ignorance, and to save our dying world. During the second year one must consider the life-oath.

On the first day of the third year one takes the oath to live according to the Vehicle for another year. On this day the Mark of Paradigm is placed upon the forehead. After the first day and for the remainder of the third year the adherer may choose either the forehead or the right hand to bear the Mark. As the tilak fades it must be replaced in either of the two settings.

Note that the settings are equal; neither holds superior status above the other. The essential difference is that one is more and one is less visible to others. During the third year one must consider the placement of the Seal.

An adherent may at any time swear the sacred life-oath to forever live in accordance with the Vehicle. Once this has been fulfilled, beginning on the first day of the fourth year the adherer may receive the Seal of Paradigm in either the forehead or the right hand, as chosen by the individual. The Seal is an indelible tatau identical to and permanently replacing the Mark. Once the sacred life-oath is sworn and the Seal is placed, one is joined into the Continuum of the Sealed.

Details of the Paradigm:

- Both Mark and Seal shall be circular in shape, possess a diameter that is approximate to the average diameter of the human pupil, and contain a pigment that is neutral in color.
- To set Mark or Seal upon the right hand open the fingers slightly and locate the point that is approximately equidistant from all edges of the hand and the webbed skin of the fingers and thumb.
- To set Mark or Seal upon the forehead locate the point that is directly center, at the origin of both axes.

Neither Mark nor Seal may be taken for reasons of vanity or in mere support of the Vehicle's mission, neither shall they come to represent individual Elements separate from the whole. Symbols of the Vehicle shall forever exist as a warning to humankind from those sworn to the path.

VI. Transmission

It serves little purpose for a man or woman to be overflowing with knowledge, compassion, and perseverance for our Earth when ignorance and cruelty reign and the destruction of our world continues. Every human on Earth must be taught to care about those things which are of greatest importance above those things that are arbitrary, without value, and which distract them from their greatest responsibilities.

Noble beings which stand for these high principles must labor to spread the Vehicle over all the Earth. With small families we will not change the world by passively handing down tradition through descendants, nor does Earth have time. We must purposefully move to influence human culture, society, and all civilization.
